

# Metallica Limited Edition Turntable

## Artist Collection Turntable

- Pre-adjusted Pick it S2 C cartridge & SME headshell
- 8,6" S-shape aluminium tonearm
- Tracking force & anti-skating fully adjustable
- Heavy MDF plinth in unique Metallica design
- Mirror finished, metal top plate
- Heavy glass platter & aluminium sub platter
- Metal drive pulley
- Height-adjustable metal feet
- Precision belt drive with electronic speed control
- Premium semi-symmetrical phono cable with metal connectors
- Gold plated RCA connectors
- Handmade in Europe

**Speed:** 33, 45/(78) (electronic speed change)

**Drive principle:** belt drive with electronic speed control

**Platter:** heavy glass platter

**Platter bearing:** high precision stainless steel axle in bronze bushing

**Wow & flutter:** 33: +/-0,16%; 45: +/-0,14%

**Speed drift:** 33: +/-0,40%; 45: +/-0,30%

**Signal to noise:** 68dB

**Tonearm:** 8,6" S-shape aluminium; SME headshell

**Effective arm length/mass:** 218,5 mm / 7,5 g

**Overhang:** 18,5mm

**Included accessories:** 15V DC / 0,8A power supply, 78 RPM round belt, 7" single adapter, feltmat

**Power consumption:** 4W / 0W standby

**Dimensions:** 430 x 120 x 430mm (WxHxD)

**Weight:** 4,5 kg net

## ... AND VINYL FOR ALL

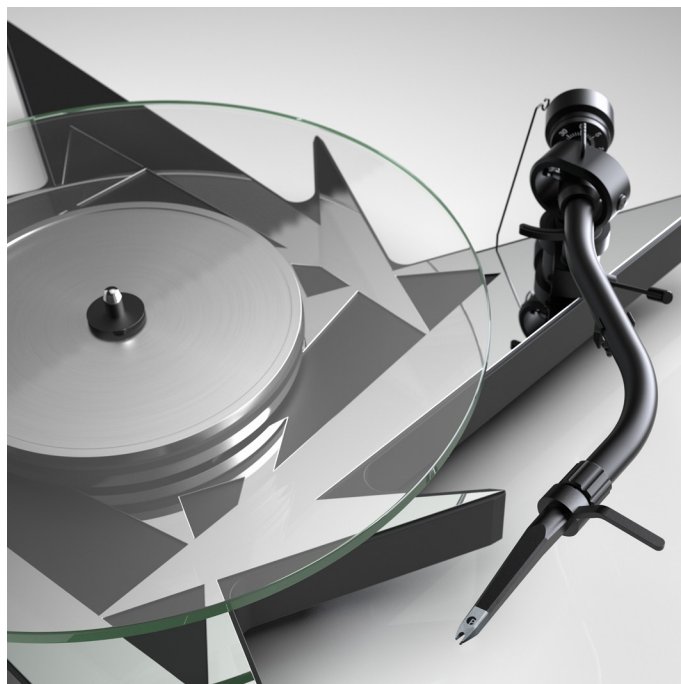

The Metallica Team reached out to us and chose Pro-Ject as their partner for a Metallica-themed record player. Pro-Ject Audio Systems is proud to announce the Metallica turntable. The Metallica turntable continues our tradition of collaborations with artists.

### Master of Vinyl

We treated the surface of this deck with a mirror-finished metal logo contour that gives the player its distinctive look. The S-shaped tonearm is fitted with a detachable SME headshell to allow quick cartridge changes. Out of the box, the turntable comes pre-adjusted with our Pick it S2 C cartridge. Tracking force and anti-skating are both adjustable and make your Metallica Limited Edition Turntable a true audiophile investment.

When you rock vinyl on this deck

– nothing else matters.

### Heavy glass platter

The glass platter is a heavy, zero-resonance design. The high mass of the platter produces the tightest and most accurate playback speeds and at the same time allows you to see the stunning turntable and all of its high-quality parts and incredible build quality - avoiding the flaws of plastic or lightweight construction.

### Aluminium sub platter, pulley and feet

The aluminium sub platter is usually one of our most sought after upgrade parts, but comes standard on the Metallica Limited Edition Turntable! The diamond cut sub-platter and pulley can be machined to much improved and higher tolerances. The aluminium sub-platter adds more mass to the entire platter and drive system, resulting in additional damping of noise and unwanted resonances. The improved tolerances during production will increase overall speed accuracy. The additional mass and super accurate pulley and sub platter diameters improve short term speed stability, or also called Wow & Flutter.

The Metallica turntable uses height adjustable heavy-duty metal feet to ensure a level positioning on every surface, because a perfectly level turntable is essential for the **Damage, Inc.**

## Hardwired... to stable speeds

In typical Pro-Ject tradition, the speed is electronically precision controlled and guarantees the most accurate and stable speeds. Change between speeds easily with the toggle switch. With the supplied round belt for 78 rpm, you can also listen to your shellac records.

## S-shape tonearm

The 8,6" S-shape aluminium tonearm comes with a detachable SME headshell. The SME headshell allows you to swap out cartridges fast and easily. The tonearm bearing and base are machined entirely out of aluminium. You won't find any plastic components in these critical parts. The Metallica Limited Edition turntable will track your vinyl records with speed, accuracy and consistency. This is **The End of the Line** for audiophile turntable design.
